Visit Our Website

1934

1940-46

The company was run by George's wife Mary while he served as an officer in the RAF.

1970

Donald Lucas entered the business now at Thornfield House in Altrincham. While passing his father on the stairs the only words spoken by his father were "good luck son".

1989

G H Lucas relocated to Century Park in Altrincham to a high tech warehouse and office facility.

2007

GH Lucas becomes UK distributors for Raytech International of Italy inventors of Magic Gel which is launched in the UK revolutionising how electrical connections are waterproofed.

2012

Continued success of the GH Lucas name headed by Nick Lucas, son of Don enables a move to Cheadle.

2015

Julian Duke joins the Company as a sales agent for the Midlands area.

2023

GH Lucas starts to increase brands, becoming UK distributors for Link2Home & QBrick products.

2026

GH Lucas introduces online ordering for their wholesaler customers.

1934

G H Lucas & Co. was founded by George Harold Lucas as a manufacturers' agent with an office on King Street in Manchester.

1952

The company relocated to 7 Albert Place in Manchester.

1978

G H Lucas relocated to Stamford Park Road in Altrincham and had additional distribution facilities in Glasgow, Leeds and Birmingham. By this time we were master distributors for the likes of Swifts cable tray, Hawke cable glands, Pirelli Components, B-Line, Gewiss and CTL.

2018

Julian & Rita Duke acquire shares in the Company and GH Lucas relocates to Telford.

2024

Additional brand of Tolsen Tools added & Lucas products start to be developed.

2026

ABOUT G H LUCAS

Established in 1934, G H Lucas & Co Ltd has built a reputation as one of the leading suppliers of cable glands and electrical installation equipment to the UK wholesale trade, both as a re-seller of its own range of quality products and also as a distributor for many major manufacturers.

With extensive stock holdings and distribution at our new depot in Telford the company is ideally placed to meet all requirements for electrical installation equipment.

Thanks to a new generation of management, over the past decade, GH Lucas & Co Ltd has evolved to become a leading organisation for manufacturers of innovative electrical products to enter the UK market.

When combining our expertise in branding, marketing, sales and distribution with the latest technology and over 80 years of industry knowledge, G.H. Lucas has quickly become one of the most creative, adaptable, forward thinking and innovative companies within the electrical industry.

ABOUT RAYTECH

Raytech, located near Milan, is the company with the widest range of accessories and components for electrical cables in the world in terms of production.

Passion for design and innovation has allowed Raytech to evolve and adapt to the needs of constantly expanding national and international market standards, without ever skimping on the same scrupulous quality which has always distinguished them in the production field.

The performance specifications of Raytech products have been tested and certified inside their laboratories to ensure maximum reliability.

Raytech's focus on sustainability has been awarded the 2023 Silver Medal by EcoVadis, a leading provider of corporate social responsibility assessments. This recognition validates their efforts to reduce environmental impact, improve working conditions, and promote ethical practices throughout their supply chain.

MAGIC GEL

Two-component gel with very high dielectric and thermal characteristics, ideal for connection systems (joint shells or enclosures) for power cables.

The insulating and sealing gel, when cast in suitable casings, ensures an IP68 degree of protection and it is able to replace all types of resins. This is a self-sealing insulation polymeric type in two practical bottles or in a single use bag, with cold cross linking. Once poured, the insulation, characterized by very low viscosity, surrounds and envelopes any type of material, cross linking in less than 10 minutes. Completely non-toxic, cross linking with a very low isothermal peak that does not thermally stress the materials it comes into contact with.

WHAT DOES A GEL FOR THIS TYPE OF SYSTEM HAVE TO GIVE?

INSULATION: Elevated voltages (1 kV operating, 4 kV testing)

THERMAL PERFORMANCE: Operating temperature 90°C, overload temperature 130°C, short circuit temperature 250°C

SEALING: Installations also possible in humid environments, flooded wells

DEGREE OF PROTECTION: Must also work with water between the cores of the cable

CERTIFIED SYSTEMS: The combination of insulation gel + casing must comply with current standards CEI 20-33 and EN 50393

SOLUTION

MAGIC GEL meets all your Energy System requirements

ADVANTAGES

- For high temperature applications
- Quick cross linking (only 10 minutes)
- Re-enterable also after long working periods
- Low viscosity
- No limited shelf life

MAGIC GEL

SPECIFICATION

Gel: UL 94-HB 
 Dielectric strength: >20 kV/mm
 Cross linking time: Fast (about 10 min. at 23°C)
 Volume resistivity: >2 . 10¹⁵ Ω cm
 Working temperature: -60°C / +200°C
 Overload temperature for short periods: Up to 250°C
 Stabilised for: Mould - UV
 Degree of protection: IP68 (in proper casings)

IP68
OFFICIALLY
TESTED

IMQ

Magic Gel protects against dust and seals the connections from the effects of continuous immersion in water when it is poured into casings protected from the ingress of solid bodies, thus helping to create a **IP68** system.

MAGIC GEL

Colour: Blue
 Includes one jug and wooden spatula
 (Magic Gel 300 excluded)

ITEM / PART NO	PACK OF	TOTAL SIZE
MAGIC GEL 300	2 bottles	300ml
MAGIC GEL 420	1 single, 2-component bottle	420ml
MAGIC GEL 1000	2 bottles	1000ml
MAGIC GEL 1000 GOLD	2 bottles in gold packaging + 1 FREE Golden Klik 0	1000ml
MAGIC GEL 2000	2 single, 2-component bottles	2 x 1000ml
MAGIC GEL 10000	2 tanks	10 litres
MAGIC GEL COMBI PACK 1	Variety of bottles	6.06 litres

MAGIC GEL COMBI-PACK

- Perfect for trade counter display
- Includes a range of different sizes, suitable for display
- Designed with electrical wholesalers in mind
- Offers more consumer options, increasing sales

Includes:
 3 x MAGIC GEL 1000
 3 x MAGIC GEL 420
 6 x MAGIC GEL 300

MAGIC GEL SPRINT

Insulating and sealing gel with very high dielectric and thermal characteristics, ideal for POWER cables, TELECOM cables and ELECTRONICS CIRCUITS.

Magic Gel Sprint is formulated for an extra fast curing directly inside the bottle. Practical, performing, eco-sustainable, it is the ideal GEL for insulating and sealing boxes of the most commonly used dimensions.

SPECIFICATION

Gel: UL 94-HB
Dielectric strength: >20 kV/mm
Cross linking time: Fast (about 7 min. at 23°C)
Volume resistivity: >2 . 10¹⁵ Ω cm
Working temperature: -60°C / +200°C
Overload temperature for short periods: Up to 250°C
Stabilised for: Mould - UV
Degree of protection: IP68 (in proper casings)

ADVANTAGES

- Suitable for installation in chlorinated and salt water
- For any type of indoor / outdoor and even submerged installation
- Re-enterable
- No limited shelf life

WONDER GEL		280ml
WONDER GEL INVISIBLE		280ml

IP68
OFFICIALLY
TESTED

IMQ

Single component insulating gels in cartridge to instantly protect new installations and oversee maintenance of all types of electrical connections.

SPECIFICATION

Gel: UL 94-HB
Dielectric strength: >20 kV/mm
Volume resistivity: >2 . 10¹⁵ Ω cm
Operating temperature: -60°C / +200°C
Overload temperature for short periods: Up to 250°C
Stabilised for: Mould - UV
Degree of protection: IP68 (in proper casings)

ADVANTAGES

- Ready to use! No mixing required! Already cross-linked! No need to wait!
- Non-setting

WHAT DOES IT GUARANTEE?

- Maximum insulation and sealing
- Effective and stable adhesion with the passing of time
- High resistance to water pressure
- Degree of protection IP68 when dispensed in suitable casings

WHY IS IT IN A CARTRIDGE?

- Always ready to use and at your fingertips
- Can be used with standard guns
- It is measurable
- No waste
- Complete with nozzle
- Extremely rapid to use even in difficult positions
- Compact

Includes one jug and wooden spatula (excludes Rubber Fluid)

ITEM / PART NO	PACK OF	TOTAL SIZE
MAGIC RUBBER 500	1 single, 2-component bottle	500g
MAGIC RUBBER 10 000	2-component tanks	100kg
RUBBER FLUID 200	2-component single dose bags	200g
RUBBER FLUID 350	2-component single dose bags	350g

Fast cross linking two-component rubber, fluid, flexible and re-enterable with unlimited shelf life.

SPECIFICATION

Cross linking time: 15 min. at 23°C
Volume resistivity: >2 . 10¹⁵ Ω cm
Dielectric strength: >20 kV/mm
Specific weight: 1.22 approx
Degree of protection: IP68 (in proper casings)

SKY PLAST

Colour: Grey

ITEM / PART NO	PACK OF	TOTAL SIZE
SKY PLAST 250	2 cans	250g
SKY PLAST	2 cans	500g

Two-component insulating rubber, mouldable, self-extinguishing paste with high dielectric characteristics.

ADVANTAGES

- Low smoke and toxic and corrosive gases emission
- Able to replace taping, heat-shrinking, resin finishes
- Flexible and elastic
- Quickly ready for use

GALACTIC ANIMAL BARRIER

Mouldable two-component rubber paste to prevent animal intrusion.

Galactic Animal Barrier is a two-component paste with no shelf life that can be easily moulded before cross linking is complete. It can be applied to entries to protect against intrusion (conduits, cable ducts and pipes etc).

It cross links quickly to form an effective barrier against small insects however it is easily removable. Ideal for electric gate type installations.

Total size: 250g | Colour: Grey
2-component rubber; 1 can for component (A+B)

ITEM / PART NO	PACK OF
GALACTIC - ANIMAL BARRIER	3 pcs / blister

SPEEDY WIRE

SPEEDY WIRE OIL	1000ml bottle	Transparent gel	6-8	About 1

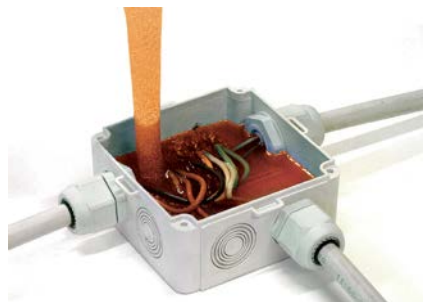

RESIN

RAY RESIN

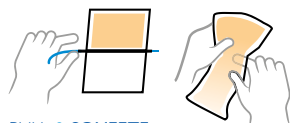

Two-component epoxy resin for installations up to 1kV.

Resin for electrical insulation and for the protection of thermosetting LV and MV accessories. The two components, the base resin and hardener, are mixed in close contact to trigger the cross linking reaction. Excellent bonding to metal, plastic and rubber components.

SPECIFICATION

Dielectric strength: 20 kV/mm
Cross linking time: About 25 min. at 25°C
Hardness: 95 Shore A
Specific weight: 1,07kg/dm³
Water absorption: 0.8% max

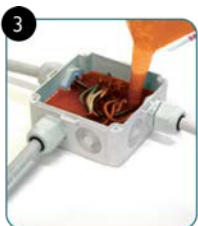

PULL & SQUEEZE

1 Remove the separator from the Rayresin bag.

2 Mix the 2 components.

3 Pour Rayresin in the tray (1' max).

4 Installation completed.

RAY RESIN 420	Two component single dose bags	420 gram

LUCAS

RESIN

SEAL UP RESIN

Insulating removable, sturdy resin with high mechanical resistance designed to prevent the penetration of moisture in both electrical and electronic fields.

Seal Up Resin is suitable for multiple applications where reliability and speed of installation even at low temperature are of crucial importance.

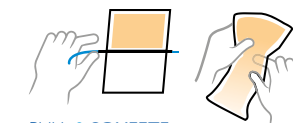

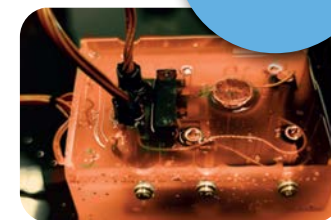

SPECIFICATION

Dielectric strength: >20 kV/mm
Cross linking time: 8-15 minutes at 23°C
Operating temperature: -60°C / +200°C
Volume Resistivity: >2 .10¹⁴ Ω cm
Water absorption after 30 days of immersion: <<0.05%
Degree of Protection: IP68 in suitable enclosure
Thermal Conductivity: 0.2 W/mK

ADVANTAGES

- Ideal for seal and insulate 0.6/1kV LV cable connections in junction boxes and cases and for accessing the connections in case of modifications
- Ideal for direct buried and submerged installations even in chlorinated water and installations in low temperatures
- No exothermic reaction
- Inspectable with translucent colour
- Mixing ratio 1:1

HOW IS IP68 DEGREE OF PROTECTION OBTAINED?

The GEL protects against dusts and seals the connections from the effects of continuous immersion in water when it is poured into enclosures protected from the ingress of solid bodies, therefore contributing to create an IP68 system.

SUPER BLOCK

CONNECTORS
INCLUDED

The new Gel Box with integrated lever connectors: ready, complete, submersible and compact.

The GEL BOX range, designed in 2015, is enriched with a new range of compact and waterproof connecting devices. For increasingly secure and high-performance connections over time.

ADVANTAGES

- For straight or branch connections of 3 or 5 rigid or flexible wires up to 4 mm²
- Tool-less
- Can be powered immediately - Always re-enterable
- Pre-filled with conforming visco-elastic gel, not classified as hazardous
- Re-usable
- Without shelf life

SUPER CLIK

CONNECTORS
INCLUDED

Range of fast gel pre-filled straight or branch type joints for 0.6/1 kV multi core cables of up to 5 conductors.

The combination of the primary insulation in a cross-linked polymer gel and the highly robust insulating plastic case makes this a Class 2 joint defined by CEI 64-8. The joint has been tested in accordance with the main international specifications, with repeated flexing and torsion tests and immersion in water; it has been declared as conforming to the mechanical, electrical and sealing specifications required for plastic cable accessories. The joint and its components have an unlimited shelf life, they are chemically inert and therefore completely safe; the connections are re-enterable even after long working periods. Made of self-extinguishing components, the joint is flame retardant. For cables at 90°C working temperature.

ADVANTAGES

- Complete with insulated terminal blocks
- Re-accessible
- Flame retardant
- No limited shelf life

SPECIFICATION

Gel: UL 94-HB 
 Casing mix: UL 94-V2

INSTALLATION

KING JOINT

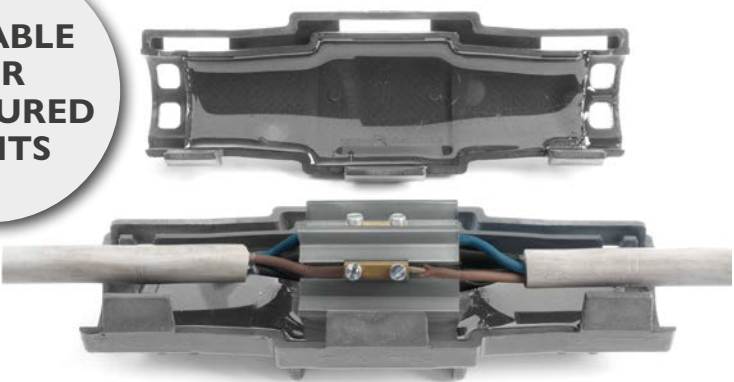

EARTH WIRE INCLUDED

CONNECTORS INCLUDED

Range of fast gel pre-filled straight or branch type joints for 0.6/1 kV multi core cables of up to 5 conductors.

The primary insulation, consisting of a cross-linked polymer gel and extremely strong plastic insulating housing, make the Class 2, in accordance with the definitions contained in CEI Regulation 64-8. The joint, tested in accordance with the most important international specifications with repeated bending and twisting cycles and immersion in water, was found to comply with the mechanical, electrical and sealing requirements necessary for accessories for plastic cables. The joint and its components have no shelf life, are chemically inert and therefore completely safe; the conductor connections are re-accessible even after long operating periods. Packaged with self-extinguishing material, it is flame retardant. Suitable for cables with a temperature of +90°C.

SUITABLE FOR ARMoured JOINTS

SPECIFICATION

- Gel: UL 94-HB 
- Casing mix: UL 94-V2
- Working temperature: 90°
- Installation temperature: -40°C / +50°C
- Fully submersible
- Can be used underground
- Halogen-free Gel
- No flame propagation: CEI 20-35 | IEC 60332-1 | HD405-1 (low smoke + toxic + corrosive gas emissions)
- Degree of protection: IPX8

ADVANTAGES

- Complete with screw connectors, spring clips + earth wire
- Re-accessible
- Flame retardant

Electrical performance:
CEI EN 50393

RAPID JOINT

Radial closing gel pre-filled joint for extruded insulation cables up to 1 kV.

Made with self extinguishing material, for cables at 90°C working temperature. The radial closing system facilitates joint application, making them re-enterable only by means of a tool.

SPECIFICATION

Gel: UL 94-HB 

Working temperature: 90°

Installation temperature: -40°C / +50°C

Fully submersible

Can be used underground

Halogen-free Gel

No flame propagation: CEI 20-35

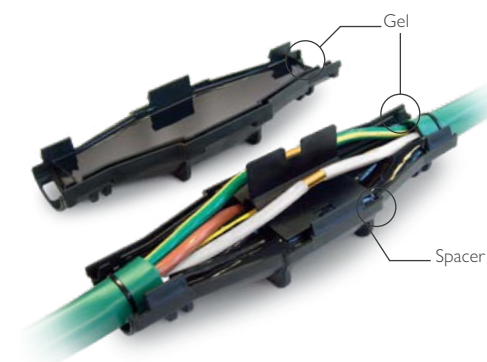

| IEC 60332-1 | HD405-1

Electrical performance:

CEI EN 50393

Class 2 with CEI 64-8

IPX8

ADVANTAGES

- With suitable spacers
- For all types of application, including submersible
- Wide range of cable formations

LUCAS

SOLAR COVER

The extra dark cover with gel filler, for sealing connectors from 4 to 10 mm² for solar.

It prevents the deterioration of connectors, preserving their performance over time, thus avoiding malfunctions and difficult and expensive maintenance. Resistant to UV rays, corrosion and immersion in water, even if salty or chlorinated. Ready, fast and always inspectable, With 15 years resistance.

SPECIFICATION

Gel: UL 94-HB 
 Casing mix: UL 94-V2
 Working temperature: 125°C
 Installation temperature: -40°C / +50°C
 Halogen-free Gel
 Loaded with CARBON BLACK UV resistant
 No flame propagation: CEI 20-35 |
 IEC 60332-1 | HD405-1
 Self-ignition temperature: > 400°C
 Operating voltage: 1500V DC

Electrical performance:
 CEI EN 50393
 Class 2 with CEI 64-8

IP68

TESTED

IMQ

ADVANTAGES

- Made of UL 94-V2 polypropylene
- Highly resistant to water, corrosion and frost
- Complete with sealing silicone gel filler, non-toxic and safe
- It is the ideal accessory to protect cable connections for solar and photovoltaic systems over the seasons and consequently affected by variations in temperature and weather conditions
- It allows the reduction of risks from electric arcs and the resulting overheating

SOLAR COVER

For connectors from 4 to 10 mm²

SOLARCOVER-6	2 pcs / box	W220 x D52 x H32 mm

READY CAST

The new pre-filled resin joint for extruded insulation cables up to 1 kV.

Thanks to its innovative pre-engraved and fracture-facilitated cable entry system, Ready Cast adapts itself quickly and extremely easily to any cable diameter, while respecting the minimum and maximum diameters that can be housed in the range. With the quick and safe connection block included in the pack or with commonly used connectors that can always be housed in the practical 4x separator, included in the kit.

FOX BOX

3 or 5 entrance jointing enclosure with gel filled perimeter chamber providing lighter weight with maximum capacity.

Kit includes accessories to maximise versatility allowing the use of cables from 8 to 18 mm in diameter or with 16, 20 and 32 mm diameter cable conduits. The internal, gel-free compartment allows for dry connections or any future alterations or disconnections. The gel, contained in the perimeter chamber also surrounds, insulates and seals any armour continuity connections or cable shields.

ABOUT QBRICK

The QBrick System brand is the modular and mobile tool's workshop, dedicated to both DIY enthusiasts and trade professionals.

Durable, spacious and functional QBrick System's toolboxes can be combined with each other in different ways depending on individual requirements.

QBrick System latches and connectors have a great impact resistance. Made of technical polyamide which provides a high durability without risk of corrosion.

QBrick System ONE and PRO toolboxes are water & dust proof. Thanks to the seal and hermetic construction, the products provide high protection for valuable tools.

Version 2.0 of the QBrick System ONE range is a new generation of toolboxes and organisers with a reinforced construction. The additional adaptation of the boxes to accommodate M8 threaded inserts makes it possible to personalise the system to suit the user's needs.

SYSTEM

SYSTEM ONE

ONE

SPECIFICATIONS

IP66

59cm

100kg

The ONE System is the largest model in the QBrick range. With an IP66 rating, all ONE system accessories are water & dust resistant. This mobile setup has a maximum load capacity of 100kg and can be combined with other QBrick products. With its spacious design, sturdy construction, and reinforced structure, the ONE System is perfect for storing large power tools, hand tools, and additional accessories.

Version 2.0 of the ONE line of products is a new generation of toolboxes and organisers with a reinforced design. Additional adaptation of the bodies for the installation of threaded inserts in the size of M8 gives the possibility of any personalization of the system for the needs of the user. The Custom version of this case model is equipped with ten threaded inserts in M8 size allowing for individual adaptation by the user.

ADVANTAGES

- Designed for storing large power and hand tools
- Can be combined with other systems from QBrick
- The ergonomic handle makes it easier to maneuver the entire set
- 4 different lid styles (VARIO, BASIC, TECHNIK, PROFI) provide a wide range of functionalities
- Polyamide fasteners guarantee great resistance to mechanical damage and insensitivity to corrosion
- Additional places in the body for mounting M8 threaded inserts
- Solid side connectors made of impact resistant polyamide
- Red boxes are made with an impact resistance material
- Black boxes are made from recycled polypropylene

ONE CART 2.0

Qbrick System ONE Cart 2.0 is the largest mobile transport box, with a load capacity of 100kg allowing comfortable transport for large and heavy tools.

The cart is equipped with a telescopic handle and 22.3cm diameter thick rubber wheels that ensure traction even in difficult terrain.

The IP66 rated box includes 2 adjustable compartments and 2 trays.

ITEM / PART NO	DIMS (HxWxD)	CAPACITY

TOOLBOXES

Choose a style to suit your needs.

BASIC

The BASIC lid in its standard features a functional trim slot along with a measuring ruler. The reinforced structure of the cover and the body guarantees high load capacity (50kg) and withstands pressure of up to 120kg, making it possible to create comfortable working platforms.

VARIO

The standard version of the VARIO lid is equipped with additional connectors that allow this version of the lid to be connected with the toolbox models from the Qbrick System PRO – 500, Toolcase, Toolbox, Organiser 100, 200 and 300 lines, and alternatively with PRO 600 boxes. The reinforced structure of the lid can withstand pressure of up to 120kg, along with a functional trim slot and measuring ruler.

TECHNIK

TECHNIK is the most professional version of Qbrick, equipped with innovative aluminium mounting rails that allow the use of classic carpentry clamps. Thanks to them, Qbrick System TECHNIK boxes can be used as work tables, necessary for precise cutting, gluing or holding. The reinforced structure of the lid can withstand pressure of up to 120kg, along with a functional trim slot and measuring ruler.

PROFI

The PROFI lid in its standard features two capacious organisers with movable dividers and polycarbonate impact slides. The reinforced structure of the lid and the body guarantees high load capacity (50kg) and withstands pressure of up to 120kg, making it possible to create comfortable working platforms along with a functional trim slot and measuring ruler.

EXPERT

The new EXPERT lid provides new storage options. Equipped with containers in different sizes, it allows you to store both small and elongated workshop accessories. The long aluminium handle provides high ergonomics for transportation. Additional adaptation of the bodies for the installation of threaded inserts in the size of M8 gives the possibility of any personalization of the system for the needs of the user.

ONE TOOLBOX 200 2.0

ONE 200 is a universal, modular toolbox with removable dividers. Each box is equipped with a flexible seal that provides full protection against the ingress of dust and water (IP66).

SYSTEM PRIME

PRIME

SPECIFICATIONS

IP66

54cm

100kg

The Prime system has been designed by integrating the best features of various systems, making it the top series of the Qbrick system brand. Optimal size, durable construction, resistance to water and dust ingress (IP66), and extensive accessory system are the basic advantages of the Qbrick System PRIME series boxes. Additionally, products from this series can be combined with the ONE and PRO lines.

ADVANTAGES

- Modularity and compatibility with ONE & PRO products
- Impact-resistant transparent covers in PROFI and EXPERT toolboxes
- Guaranteed protection of the contents in crates with secure fasteners
- IP66 Seal
- Polyamide connectors securing the contents of the boxes
- Large 9" wheels, 6cm wide, are covered with a thick layer of rubber
- Additional places in body for mounting M8 threaded inserts
- Red boxes are made with an impact resistance material
- Black boxes are made from recycled polypropylene

TOOLBOXES

Choose a style to suit your needs.

VARIO

The VARIO design is equipped with connectors that allows you to combine the toolbox with products from the PRO line, such as cases, toolboxes, drawers, boxes and organisers. The lid can withstand pressure weighing up to 120kg, enabling the ability to create a comfortable working platform, along with a functional trim slot and measuring ruler. The fastener clips guarantee protection of the contents of the toolbox.

PROFI

The PROFI lid in its standard features two containers with movable dividers and polycarbonate impact slides. The reinforced structure of the lid and the body guarantees high load capacity (50kg) and withstands pressure of up to 120kg, making it possible to create comfortable working platforms along with a functional trim slot and measuring ruler.

EXPERT

The new EXPERT design provides new storage options. Equipped with containers and adjustable compartments in different sizes, it allows you to store both small and elongated workshop accessories. The long aluminium handle provides high ergonomics for transportation. The EXPERT style has been designed with reinforced structure with polyamide fastener clips to guarantee protection of the tools placed inside.

SYSTEM PRO

PRO

SPECIFICATIONS

IP54

45cm

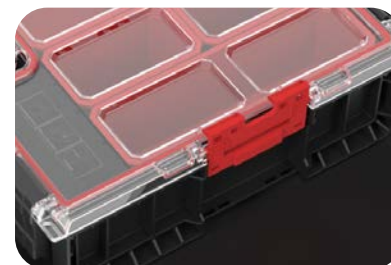

100kg

The PRO range from Qbrick is the most compact size amongst all Qbrick systems making it the number one choice when transport and work in hard-to-reach places are challenging.

The multitude of modules and the ability to combine PRO products with System ONE and System PRIME allow you to create extensive, custom sets.

ADVANTAGES

- Impact resistance covers on toolbox and box lids with transparent covers
- Polyamide fasteners guarantee great resistant to mechanical damage and insensitivity to corrosion
- Dust and water resistance in IP54 and PRO 500, 600 and 700 classed with IP55
- Double side connectors securing the contents
- Solid wheels mounted on a metal axle
- Appropriate ribs ensure high durability of the modules
- Black boxes are made from recycled polypropylene
- Red boxes are made from ultra-durable material with exceptionally resistant to mechanical damage

HOLE SAWS & ARBORS

ARBOR FOR HOLE SAW 3/8"

- 14-30mm
- Dimensions: 190mm x 65mm x 19mm

75700

ARBOR FOR HOLE SAW 7/16"

- 32-152mm
- Dimensions: 202mm x 75mm x 32mm

75701

SDS PLUS ARBOR FOR HOLE SAW 14-30MM

- 14-30mm

75702

SDS PLUS ARBOR FOR HOLE SAW 32-152MM

- 32mm - 152mm
- Dimensions: 270mm x 70mm x 30mm

75703

TORCH HEAD LAMP 7 LED 3AAA

- CE approval
- Main material: ABS
- Multi-function: 1LED-3LED-7LED
- Brightness: 50Lumens

60011

TOLSEN TORCH AA BLACK LED 50 LUMENS (INDUSTRIAL)

- CE approval
- Led Flashlight, 1 watt CREE
- Main material: aluminium
- Battery Voltage: 1.5V
- Brightness: 50 Lumens
- Range: 50M
- Working time: 1.5 Hours
- Waterproof: IP66

60031

TORCH AAA BLACK LED 150 LUMENS + ZOOM 34X110MM

- CE approval
- Led Flashlight, 3 watt CREE
- Main material: aluminium
- Battery Voltage: 4.5V
- Brightness: 150 Lumens
- Range: 120M
- Working time: 5 Hours
- IP65

60033

LASER DISTANCE METER 0.2-60M

- Measuring accuracy: $\pm 2.0\text{mm}$
- Size: $120 \times 48.5 \times 28.5\text{mm}$
- 20 groups of data storage
- Drop-resistance 1.5m
- Measuring units: m/ft/in
- Back light
- Compact & easy to use
- Soft rubber housing
- 1.8 inch screen (black-on-white)

35176

LASER DISTANCE METER 20M

- Size: $100 \times 32.5 \times 22\text{mm}$
- Drop-resistance 1.0m
- Measuring accuracy: $\pm 2\text{mm}$
- Measuring units: m/ft/in
- Backlight
- Compact & easy to use
- Soft rubber housing
- Perfect for DIY users

35172

LEVEL MINI 3 VIAL MAGNETIC 220MM

- Aluminium
- With 3 bubbles
- Accuracy: 1.0mm/m

35059

LEVEL 3 VIALS MAGNETIC

- Accuracy: 0.5mm /m
- Two milled surface
- Anti-shock end caps

35112	60cm
35114	100cm

TAPE MEASURE METRIC+ INCH ABS

36004	5mx25cm
36005	8mx25cm

GREEN-BEAM SELF-LEVELING 360° HORIZONTAL CROSS-LINE LASER LEVEL

- CE Approval
- Wave Length 520nm
- Beam Accuracy: H/V Line $\pm 3\text{mm}/10\text{m}$
- Expanded Angle: C/360° V: 130°
- Max Working Distance: 30m
- Power Supply: 4xAA Battery
- IP Rating: IP54
- Pulse Function
- Switchable Manual Mode
- Operating Temp: $-10^\circ\text{C} - +50^\circ\text{C}$

35153

ABOUT LUCAS

Established in 1934, G H Lucas & Co Ltd has built a reputation as one of the leading suppliers of cable glands and electrical installation equipment to the UK wholesale trade, both as a reseller of its own range of quality products and also as a distributor for many major manufacturers.

With extensive stock holdings and distribution at our new depot in Telford the company is ideally placed to meet all requirements for electrical installation equipment. Thanks to a new generation of management, over the past decade, GH Lucas & Co Ltd has evolved to become a leading organisation for manufacturers of innovative electrical products to enter the UK market.

When combining our expertise in branding, marketing, sales and distribution with the latest technology and over 80 years of industry knowledge, G.H. Lucas has quickly become one of the most creative, adaptable, forward thinking and innovative companies within the electrical industry.

LUCAS

SENSORS

FLUSH OCCUPANCY SENSOR

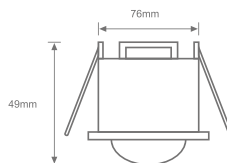

PART NO

LS-FLUSH8

SPECIFICATION

- Infrared motion sensor
- For indoor use
- 360° detection range

Power Source: 220-240V/AC 50/60Hz
 Rated Load Max: 1200W (220-240V/AC)
 600W (Energy Saving or LED)

Detection Distance: Max 8m (<24°C)

Time Delay: 10 sec ± 3 sec to 30 min ± 2 min (adjustable)

Ambient Light: <3 - 2000 LUX (adjustable)

Installing Height: 2.2 - 4m

SURFACE OCCUPANCY SENSOR

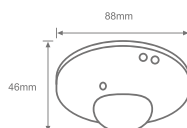

PART NO

LS-SURF6

SPECIFICATION

- Infrared motion sensor
- For indoor use
- 360° detection range

Power Source: 220-240V/AC 50/60Hz
 Rated Load Max: 1200W (220-240V/AC)
 600W (Energy Saving or LED)

Detection Distance: Max 6m (<24°C)

Time Delay: 10 sec ± 3 sec to 15 min ± 2 min (adjustable)

Ambient Light: <3 - 2000 LUX (adjustable)

Installing Height: 2.2 - 4m

MINI PIR

PART NO

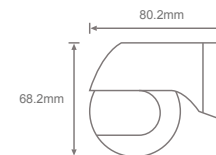

LS-MINI12B

LS-MINI12W

SPECIFICATION

- Infrared motion sensor
- For outdoor use
- 180° detection range

Power Source: 220-240V/AC 50/60Hz
 Rated Load Max: 800W (220-240V/AC)
 400W (220-240V/AC)
 400W LED

Detection Distance: Max 12m (<24°C)

Time Delay: 10 sec ± 3 sec to 15 min ± 2 min

Ambient Light: <3 - 2000 LUX (adjustable)

Installing Height: 1.8 - 2.5m

Detection Motion Speed: 0.6 - 1.5m/s

PHOTO CELL KIT

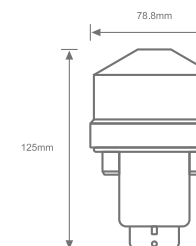

PART NO

LS-PCK1

SPECIFICATION

- Max LED
- Light control sensor
- 360° detection range
- Dusk to dawn photocell kit

Power Voltage: 220-240V/AC

Power Frequency: 50/60Hz

Ambient Light: 5 - 15 LUX

Rated Current: 10A

Time Delay: 10 sec ± 3 sec to 15 min ± 2 min (adjustable)

Ambient Light: <3 - 2000 LUX (adjustable)

Installing Height: 2.2 - 4m

GLANDS

BRASS NICKEL PLATED GLAND

Includes Locknut | IP68

SPECIFICATION

Approvals: CE, RoHS, IP68

Material: Nickel-plated brass

Clamp: PA66 (nylon), UL94-V2

Seal: NBR Silicone rubber

O-ring: NBR Silicone rubber

Protection: IP68 at 10 bar

Temp Range: -40°C to 100°C

PART NO	CABLE RANGE
NP-GM12	3 - 6.5 mm
NP-GM16	5 - 10 mm
NP-GM20	6 - 12 mm
